iGS01S Remote Control Server Design

Mar, 2018
rev. 1

- iGS01S connect to assigned Admin Server

- List connection from iGS01S
- Issue command to iGS01S

- iGS01S can be configured to connect to assigned administration server through TCP connection with RCHOST RCPORT setting
- The Administration Server should accept connection from iGS01S and decide its own authentication policy if required
- The Administration Server can issue command to iGS01S through created connection
- An example Administration Server implementation is provided as reference purpose

Example

```
→@itrs-ideapad ~ nc 192.168.1.20 5001
